Analysis

Yesterday's rise is a positive sign as the market closed at the high of the session, forming a probable higher low, if this rise continues today. Our confirmation of strength is a break above the peak that lies at 30,700. If the market closes positively today, we will probably break this peak in the beginning of the next week, which should then the market to higher levels.

We still recommend keeping our stop below 29,800, which is now a more important support than before.

EGX Small Caps Index/ EGX 70 Daily chart

Analysis

The EGX 70 refused to confirm a break below 7,000 and rebounded significantly to close at 7,070, giving hopes once again that a nice rise can take place.

Our resistance lies at 7,170; a break above this level will be bullish and should lead to a significant rise that should reach the index peak.

Those who want to place a nearby stop can still use the 7,000 as their stop.

Resistance

ESRS  The break above 105 is a good signal despite that we still have a resistance at 113. If ESRS continues trading above 105 today, we will probably break above the peak, which will sent the stock to new highs.

Support

No stocks broke their support yesterday

Testing

Support

Resistance

HRHO  We like the stock and we are expecting it to witness a strong rise. A break above 24 will trigger a new entry signal and a significant rise will probably follow.

CICH  Broke 5 to the upside with high volumes and closed at its next and more important resistance that lies at 5.25-5.3. A breakout will lead the stock near 6.5.

OLFI  We recommend waiting for a break above 11. Such a breakout will trigger an entry signal with a target around 11.8. OLFI is one of the stocks that are expected to witness a nice rebound.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from “↓Down” to “↔ Flat” is considered an upgrade and vice versa.

- Buy: Buy the full position.
- P.Buy: Buy portion of a position
- Hold: Don't Buy or sell.
- P.SELL: Sell portion of a position.
- Sell: Sell the full position.
- Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral .

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
