Analysis

The EGX 30 touched the 30,000 and declined at the end of the session to close relatively lower. The resistance of 30,000 is expected to be broken to the upside. We might see a decline to the 29,500-29,600, which will probably be followed by a breakout above 30,000. As we mentioned before, we are expecting a relatively easy break above 30,000, which will confirm the end of the major correction.

Our uptrend is up and still expected to continue in the same direction in the next couple of years.

EGX Small Caps Index/ EGX 70 Daily chart

Analysis

The EGX70 index closed at 6,600 after reaching a high of 6,700. Our first significant support lies at 6,400; if the EGX 70 approaches this level, buying power will probably appear, which will lead to a renewed rise.

On the other hand, if we rebound from here or from slightly lower levels, the next rise will probably break the index' peak.

Resistance

COMI  The 82 break is a breakout as well as the 84 break. If COMI confirms trading above 84 today, we will probably see a rise to the 100 or close to this level.

EXPA  Closed at 22.5 after breaking above 22. EXPA looks good and is expected to reach 25, followed by 28.

Support

No stocks broke their support yesterday

Testing

Support

EKHO  The 0.72 level is a support; we expect buying power to appear if EKHO approaches support. If it rebounds from here, we will probably find resistance near 0.8.

Resistance

TMGH  We expect TMGH to witness a short-term rise, especially if it breaks 62 to the upside, We need to see first the stock breaking above 60.

CIEB  Closed at 20.4 and is still facing a strong resistance at 21-21.15. A breakout above this resistance range will trigger a major entry signal.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

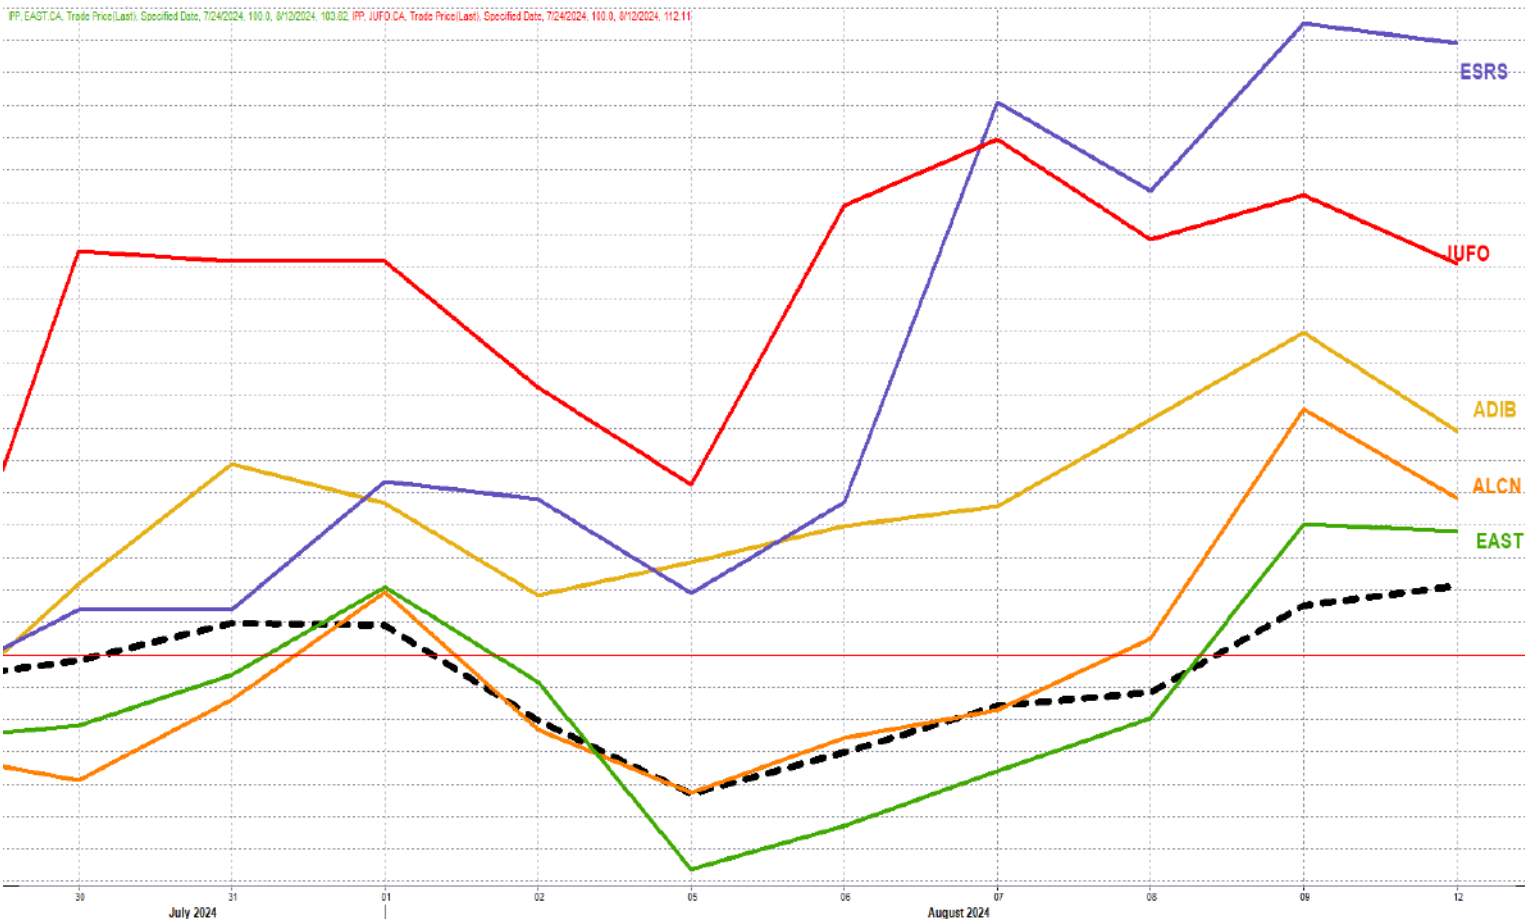

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from “↓Down” to “↔ Flat” is considered an upgrade and vice versa.

- Buy: Buy the full position.
- P.Buy: Buy portion of a position
- Hold: Don't Buy or sell.
- P.SELL: Sell portion of a position.
- Sell: Sell the full position.
- Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral .

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
