EGX 30 Index / Daily Chart

.EGX30

Analysis

The EGX 30 index closed at 29,900, same as yesterday. This is bullish as it tells us that the index does not decline from this important resistance. As we mentioned before, if we continue trading today at this level without declining, we should break the 30,000 soon. Our stop is placed below 29,300; we do not recommend selling at any decline as long as we are trading above 29,300.

Our indicators look good and we do not have any weakness here yet.

EGX Small Caps Index/ EGX 70 Daily chart

Analysis

The EGX 70 closed almost at resistance, which is a level that should be watched. A decline from here is probable; however, if the index maintains itself here, we will break upwards soon.

Our trailing stop is 6,550; this is very unlikely to be violated, this is why we recommend holding.

Breakouts

Resistance

ADIB Closed at 42.9 after breaking above 41.5. ADIB is one of the outperformers and still expected to continue its strong performance. This is a buy and hold stock.

ARCC Broke above 10.8 and closed clearly above it. We recommend buying dips and our target lies around 14.

CANA Broke resistance with very high volumes and is expected to continue its rise. We recommend stepping in at minor dips with a target at 18.

Support

No stocks broke their support yesterday

Testing

Support

Resistance

BTFH Minor resistance lies at 3.25. If BTFH declines from here, the decline will be minor; a break above 3.25 will lead to a re-newed strong rise. We expect the stock to retest the 3.8 level.

SAUD It looks like SAUD will break its resistance that lies at 11.6. A breakout above this level will be bullish and will lead the stock to 13.

| (T+0 / T+1) for Today | | | | | | 4 | PIONEERSSECURITIES | | |
|-------------------------|----------------|------|---------------|---------------|----------------|----------------|--------------------|-----------|--|
| Symbol | S. Description | Last | Buying Area 1 | Buying Area 2 | Selling Area 1 | Selling Area 2 | Selling Area 3 | Stop Loss | |
| | | | | | | | | | |

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face if we consider the stock under study bullish, and a bear face if we consider it bearish. We also added a big bullet if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
