Analysis

The index closed on a negative note at 30,100 as market continued its weak performance. As we mentioned before, market breadth is weak and avoiding margin completely during this period until a clear improvement in the overall market performance occurs first, followed by a confirmed buy signal is the best decision especially that trading values and volumes are weak also and only limited number of stocks or handful ones are witnessing the rises which reflects a clear weakness.

On the short term, first support at 30,000 followed by 29,750. We recommend short-term investors to place their stop strictly below 29,700. it is important to note that if a clear break below 29,700 takes place, this will put the most important support at 29,200-29,000 area in jeopardy. On the other hand, first minor resistance lies at 30,600 while our re-entry is above 30,900, but we prefer to have a confirmation from EGX100 as averages must confirm each other.

Finally, We will reiterate the importance of avoiding margin in addition to that focusing on outperformer stocks is the best decision at all times and especially during non directional volatility periods.

EGX Small Caps Index/ EGX 70 Daily chart

Analysis

For the first time in quite some time, the small and mid-cap index faced strong selling pressure in a single session. The index witnessed a strong decline as it closed at 8,230 losing 225 points or a decline by nearly (-2.7%). Therefore, our protective stop was activated after breaking below 8300 level.

Next support at 8,170 level. We recommend short- term investors to place their stop strictly below this level.

Our re-entry level is above 8,520.

Resistance

No stocks broke their resistance

Support

BTFH  Broke its support that lies at 2.80 to close at 2.67. Next target at 2.55 followed by 2.38. Any confirmed breakout below the latter level will lead to more strong declines. Re-entry signal is above 3 level.

SKPC  Confirmed its breakout below 20. This will be seen as bearish. Next target at 18.5. Any confirmed breakout below the latter level will lead to more strong declines. Re-entry signal is above 21 level.

Testing

Resistance

Support

FWRY  Support area lies at 8.05. Thus, a clear break below this level will lead it to retest 7.65-7.5 area. We recommend short-term investors to place their stop loss below 8.05.

SWDY  Support area lies at 81. A clear break below this level will lead it to 78 initially. Only a confirmed break below 81-78 area will lead to extension of correction phase with targets at 68 followed by 60 where strong buying power should appear. We stock investors to place their stop loss below the mentioned support area.

ORWE  Closed at 25.60 near the bottom of yesterday's session. We recommend short-term investors to place their stop strictly below 25.40 as a confirmed breakout below this support can lead to extension of the correction phase with minimum target at 24 . Major stop is below 22.5.

Symbol	S. Description	Last	Buying Area	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	-------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓Down" to "↔ Flat" is considered an upgrade and vice versa.

- Buy: Buy the full position.
- P.Buy: Buy portion of a position
- Hold: Don't Buy or sell.
- P.SELL: Sell portion of a position.
- Sell: Sell the full position.
- Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral .

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
