### Analysis

The index erased its early gains after facing strong selling pressure in the second half of the session that was able to push EGX30 to erase gains of 200 points to close on a negative note at 30,500 losing 100 points. However, the index does not fairly and credibly reflect the reality of the overall market performance, as more than two-thirds of the index's stocks closed on a negative note, including many stocks that witnessed a 5% decline. On contrary of that, EGX100 closed on a negative losing about 200 points or (-1.65%) after violating the 11,600 point level.

Again, this decline was not a surprise as we mentioned several times recently that the market breadth is weak and advised our investors to avoid margin completely during this period until a clear improvement in the overall market performance occurs first, followed by a confirmed buy signal as the best decision especially that trading values and volumes are weak and only limited number of stocks are witnessing the rises which reflects a clear weakness in the market breadth.

Today we will highlight EGX100, especially since it is distinguished from the EGX30 by the absence of stocks with heavy weights that affect its performance, which makes it express the general performance of the market with credibility. first level to watch lies at 11,500 followed by 11,300-11,200 area (which coincides with 29,800 on EGX30) as our target after the violation below 11,600. If this correction extends, our downside target will be at 10,900 level. Thus, we will probably see more declines.

Finally, We will reiterate the importance of avoiding margin in addition to that focusing on outperformer stocks is the best decision at all times and especially during non directional volatility periods.

### EGX Small Caps Index/ EGX 70 Daily chart

### Analysis

Closed below its support that lies at 8,450. If this violation is confirmed today, next target will be at 8,300 followed by 8,170. On the other hand, Only a break above 8,650 will lead to the next targets that lies at 8,850-9,000 area, followed by 9,400.

We recommend Short- term investors to place their stop below 8,170.

## Resistance

No stocks broke their resistance

## Support

**TAQA**  Closed below its support level that lies at 12.6. If this violation is confirmed today, a sell signal will be triggered with targets at 11.8 initially followed by 10.25.

**SKPC**  Closed clearly below its support level that lies at 20. If this violation is confirmed today as it is the weekly close, a sell signal will be triggered with targets at 18.5 initially followed by much lower levels.

# Testing

## Resistance

## Support

**TMGH**  We recommend TMGH investors to place their stop below 55.5 strictly. If this breakout happens, our target will be at 51.2 initially. On the other hand, first resistance lies at 58.9 followed by 60.5.

**BTFH**  Support lies at 2.8. Thus, a clear break below this level will lead BTFH to 2.65 followed by 2.55 then 2.40. stop loss is below is below 2.8

**MASR**  Support area lies at 3.9-3.85. We recommend stock investors to place their stop loss below 3.80.

Symbol	S. Description	Last	Buying Area	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	-------------	----------------	----------------	----------------	-----------

*N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators*

*The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.*

### **Tips on reading the report**

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral .

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
