### Analysis

As we mentioned before, our confirmed buy signal will be triggered at the breakout above 31,000 level accompanied by high volumes and real participation from the majority of the market stocks. The index closed at 31,060. If this breakout is confirmed today, this will pave the way for a nice rise on short- term with a target at 31,800 followed by 32,200.

On the other hand, first intraday support lies at 30,800 followed by 30,650. We recommend short-term investors to place their stop below 29,750 while our major stop is below 29,200-29,000 area.

Finally, focusing on outperformer stocks is the best decision at all times and especially during non directional volatility periods.

## EGX Small Caps Index/ EGX 70 Daily chart

### Analysis

Closed at 8,588 level after hitting new highs which is bullish. As we mentioned before, next target will be set at 8,600 followed by 8,800 then 9,250-9,400 area.

On the other hand, first intraday support lies at 8,450 followed by 8,350. We recommend near-term investors to place their protective stop to 8,350 while our main stop is below 8,150 level.

Our view is bullish since EGX70 is outperforming its counterpart EGX30 and hitting new highs.

## Resistance

**OIH**  Closed at 0.446 after breaking its resistance that lies at 0.44 accompanied by moderate volumes. Retesting 0.47 is the most likely scenario to happen. However, we expect testing 0.50-0.52 area where historical peak lies. Our stop is below 0.414.

## Support

No stocks broke their support yesterday

# Testing

## Resistance

**GBCO**  We expect a breakout above 15.05 level. Such breakout is an early signal for another break above 16.2 where historical peak lies. we expect much higher targets to come that could lead to 20 level at least . GBCO looks good. Stop loss is below 13.45.

**ATQA**  Closed at 5.65. If breakout above 5.6 is confirmed, a strong rise should follow with much higher target. Our stop is below 5.15.

**RAYA**  A clear breakout above 3.47 will be trigger a new buy signal with target at 3.75 where historical peak lies. However, we expect much higher targets to come. Stop loss is below 3.

## Support

Symbol	S. Description	Last	Buying Area	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	-------------	----------------	----------------	----------------	-----------

*N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators*

*The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.*

Guidelines

**Bullish**

**Bearish**

**Neutral**

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from “↓Down” to “↔ Flat” is considered an upgrade and vice versa.

- Buy: Buy the full position.
- P.Buy: Buy portion of a position
- Hold: Don't Buy or sell.
- P.SELL: Sell portion of a position.
- Sell: Sell the full position.
- Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

### **Tips on reading the report**

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral .

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
