Analysis

The index fell in the second half of Monday's session as the market witnessed clear selling pressure to close at 29,930. as we mentioned before, witnessing another decline is a probable scenario due to the weak trading values and volumes in the last rebound. First support lies at 29,900 followed by 29,700. It is important to stabilize above the latter level followed by a strong rebound accompanied by high volumes to confirm a higher low and a breakout above 30,300 points will then become the most likely scenario.

On the other hand, any confirmed breakout below 29,600 will put the most important support at 29,200 level in jeopardy.

Finally, focusing on outperformer stocks is the best decision at all times especially during non directional volatility periods. Our main stop loss is below 29,000.

EGX Small Caps Index/ EGX 70 Daily chart

Analysis

Witnessed clear selling pressure after reaching first target of the upward rebound. As we mentioned before, stabilizing above 8,300 will lead EGX70 to another rise and retesting 8,650 level is the most likely scenario to happen.

On the other hand, any clear breakout below 8,250 will lead EGX70 to 8,150-8,100, we will then wait the formation of a higher low from this area.

We recommend those who want to buy at current decline to avoid margin and placing their stop loss strictly below 8,100.

Resistance

No stocks broke their resistance

Support

No stocks broke their support

Testing

Resistance

CCAP  A clear break above 2.45 will lead CCAP to 2.65 initially. Only a confirmed breakout above the latter level will lead to more strong rise with target at 3-3.2 area. Short-term stop is below 2.15.

DSCW  A clear break above 2.55 will lead DSCW to 2.75 initially, followed by 3. Stop loss is below 2.2.

EFID  A clear break above 29 will lead EFID to 31 initially, followed by 33. Stop loss is below 26.5.

Support

Symbol	S. Description	Last	Buying Area	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	-------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from “↓Down” to “↔ Flat” is considered an upgrade and vice versa.

- Buy: Buy the full position.
- P.Buy: Buy portion of a position
- Hold: Don't Buy or sell.
- P.SELL: Sell portion of a position.
- Sell: Sell the full position.
- Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral .

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
