

# TECH TO THE POINT

23-July- 2024

This report must be read with the disclaimer on the last page

### **Analysis**

The breakout above 28,900 still needs confirmation today as sellers appeared yesterday and were able to bring prices lower than morning levels. If we trade back below 28,900, we might see a slightly correction which will create a higher low (from 28,000 or above).

We expect, however, that the market will either confirm the breakout today or will move in a tight lateral range for few sessions before breaking upwards once again.

As we mentioned before, the breakout above 30,000 is expected.

# EGX Small Caps Index/ EGX 70 Daily chart

## **Analysis**

If a correction takes place, this will be a chance to step in as the overall direction of the major trend is up. We like the EGX 70 and are expecting it to reach higher levels.

The 6,900 is our target but we are even expecting much higher targets.

### Resistance

**EKHOA** Broke above 30.5 and closed at 31.05. The stock is expected to reach 33; if it breaks this level, a stronger rise will probably follow.

We need to see a confirmation of the 21 level to add to positions or to buy. The stock looks good and is expected to continue its rise. Our target lies around 26.

**POUL** Closed at 8.54 after breaking above 8.35. The breakout came on high volumes and our target lies around 10. Stops should be placed below 7.8.

The stock still has a resistance at 6.35, but if it continues trading above 6.1 for few sessions, we will probably break 6.35, which should lead UNIT to 7.8.

### **Support**

No stocks broke their support yesterday

# **Testing**

### Support

### Resistance

**ORWE** The 24.35-24.5 is a resistance range for the stock. A breakout will trigger a new entry signal. Our stop should be placed below 22.5.

Resistance lies at 8.35. The high volumes that appeared the past few sessions is a good sign of a potential breakout above 8.35. We expect EGCH to reach 10.

Symbol S. Description

Last Buying Area 1 Buying Area 2 Selling Area 1

Selling Area 2 Selling Area 3 Stop Loss

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

### Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face if we consider the stock under study bullish, and a bear face if we consider it bearish. We also added a big bullet if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
