Analysis

Unfortunately, the index broke 30,500 level that represents the 50% retracement level of the last major rise and confirmed 30,650 level violation. As we know, the stop loss was actually activated after breaking the 30650 level, but this breakout was confirmed by breaking the 30500 level, as the index closed at 30400. Based on the current market action, we expect more declines. Next target at 30,200-30,000 area followed by 29,500 level.

It is important to note that we will not turn our view to the bearish side as long as trading continues above the 29200 level.

On the other hand, first sign of strength will be triggered at 30,800 breakout. However, our confirmed buy signal (market re- entry) will be triggered at 31,300 breakout.

EGX Small Caps Index/ EGX 70 Daily chart

Analysis

EGX70 is still outperforming its counterpart EGX30. The index closed at 8,360. Thus, if it stabilizes above this level, we will probably retest the peak at 8450. Only a clear break above this peak will lead to hitting new highs and next target will be set at 8,600 followed by 9,250.

On the other hand, Next support lies at 8,100-8,000 area.

We recommend near- term investors to place their protective stop below 8,100 while short term stop loss is below 7,800.

Resistance

No stocks broke their support yesterday

Support

No stocks broke their support yesterday

Testing

Resistance

OIH  Resistance lies at 0.47. A clear breakout above this level will be seen as bullish with a target at 0.5-0.52 area where historical peak lies. stop loss is below 0.437 initially.

BINV  Resistance lies at 26.40. A clear breakout above this level will be seen as bullish and an early signal for another breakout above 27.30 where historical peak lies. This scenario will pave the way for strong rise and hitting new highs. stop loss is below 23.90 initially.

EGAS  If a clear rebound from current levels takes place, we will probably retest the resistance at 45.60. Only a clear breakout above this level will trigger a confirmed buy signal with target at 51. stop loss is placed below 40.85. EGAS looks good.

PRCL  A clear breakout above 11.8 level will be seen as bullish and will lead PRCL to 12.20 initially, followed by 12.80, then 14. our stop loss is placed below 10.8.

Support

Symbol	S. Description	Last	Buying Area	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	-------------	----------------	----------------	----------------	-----------

--	--	--	--	--	--	--	--

--	--	--	--	--	--	--	--

--	--	--	--	--	--	--	--

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral .

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
